

South Carolina College of Pharmacy Fall Symposium 2015

November 7, 2015 • 715 Sumter Street, Columbia, SC 29208

Instructors

Betsy Blake, PharmD, BCPS, Clinical Assistant Professor & Director of Interprofessional Education, SCCP- USC Campus; **Brie Dunn**, Pharm D, Clinical Assistant Professor, SCCP-USC Campus; **Gene Reeder**, RPh, PhD, Professor, Pharmaceutical and Administrative Sciences, Presbyterian College, Clinton, SC and Distinguished Professor Emeritus, USC College of Pharmacy.

Agenda:

8:00am Registration/Check-In and Welcome

8:30am-10:00am Update and Review of Statutes and Regulations Governing Pharmacy Practice (1.5 hrs)
ACPE# 0062-0000-15-156-L03-P & 0062-0000-15-156-L03-T

This activity is designed to provide and update on state and federal statutes and regulations governing pharmacy practice with a focus on areas where compliance may be a concern and illustrate emerging trends in pharmacy practice law.

At the conclusion of the activity, the pharmacist will be able to:

- Recall recent changes to federal statutes and regulations governing pharmacy practice in South Carolina;
- Identify areas within the SC Pharmacy Practice Act and Controlled Substances Act where compliance may be a concern;
- Explain the concepts of
 - a. a valid prescription order
 - b. a valid patient-physician relationship
 - c. a corresponding responsibility for the prescribing and dispensing of controlled substances
- Discuss challenges that pharmacists encounter while working to meet their responsibilities to customers and restricting the use of controlled substance medications to those with legitimately medical needs;
- Describe a systematic approach that can be used by pharmacists for screening controlled substance prescriptions
- Discuss emerging duties and responsibilities of pharmacists as illustrated in recent case law.

At the conclusion of the activity, the pharmacy technician will be able to:

- Recall recent changes to federal statutes and regulations governing pharmacy practice in South Carolina;
- Identify areas within the SC Pharmacy Practice Act and Controlled Substances Act where compliance may be a concern;
- Explain the concepts of
 - a. a valid prescription order
 - b. a valid patient-physician relationship
 - c. a corresponding responsibility for the prescribing and dispensing of controlled substances
- Discuss challenges that pharmacy technicians encounter while working to meet their responsibilities to customers
- Describe a systematic approach that can be used by pharmacy technicians for screening controlled substance prescriptions
- Discuss emerging duties and responsibilities of pharmacy technicians as illustrated in recent case law

10:00am-10:10am Break

10:10am-12:10pm Controversies and Updates in the Management of Dyslipidemia (2 hours)

ACPE# 0062-0000-15-157-L01-P & 0062-0000-15-157-L01-T

This activity is designed to update pharmacists and pharmacy technicians on the controversies associated with clinical guidelines and treatment of dyslipidemias as well as the emerging trends in therapy including non-statins such as PCSK9 inhibitors.

At the completion of this activity, the pharmacist will be able to:

- Assess a patient's risk for atherosclerotic cardiovascular disease.
- Apply national treatment guidelines for dyslipidemia to unique patient populations.
- Recommend appropriate interventions based on barriers to statin adherence.
- Evaluate available and emerging therapies for dyslipidemia, including non-statins such as PCSK9 inhibitors.

At the conclusion of this activity, the pharmacy technician will be able to:

- Review tools available to assess patient's risk for atherosclerotic cardiovascular disease
- Recognize new therapies for dyslipidemia including non-statins such as PCSK9 inhibitors
- Explain the basic approach to treating a patient with dyslipidemia as recommended by available treatment guidelines.
- Review patient safety and risks associated with statin therapy

12:10pm-1:00pm Lunch – Box lunches provided

1:00pm-2:30pm Immunization Update 2015 (1.5 hours)

ACPE# 0062-0000-15-158-L01-P & 0062-0000-15-158-L01-T

This activity is designed to update pharmacists and pharmacy technicians on recent changes in adult and pediatric recommendations as well as highlight best practices for pharmacy-based immunization delivery. Dr. Blake will also highlight recent updates in the SC Pharmacy Practice Act related to immunizations.

At the conclusion of this activity, the pharmacist will be able to:

- Describe best practices for pharmacy-based immunization delivery
- Explain key components of the SC Board of Medical Examiners influenza protocol
- Review Updates in the SC Pharmacy Practice Act regarding immunizations.
- Describe recent changes in adult and pediatric immunization schedules
- Apply immunization recommendations to specific patients.

At the conclusion of this activity, the pharmacy technician will be able to:

- Describe best practices for pharmacy-based immunization delivery.
- Identify opportunities to improve vaccination rates.
- Describe the role of the pharmacy technician in improving the efficiency of immunization delivery.
- Explain appropriate storage requirements for vaccines.

2:30pm-3:30pm What's New in Diabetes Management? (1.0 hour)

ACPE# 0062-0000-15-159-L01-P & 0062-0000-15-159-L01-T

This activity is designed to update pharmacists and pharmacy technicians on recent changes in guidelines for treatment of patients with diabetes as well as the newer medications now available and the evidenced based role in therapy. The importance of lifestyle modifications in outcomes in diabetes treatment will also be discussed.

At the conclusion of this activity, the pharmacist will be able to:

- Discuss updated guidelines for diabetes management.
- Review newer medications available to treat diabetes and identify appropriate place in therapy.
- Develop and appropriate plan for individual implementation of lifestyle modifications and treatment recommendations.

At the conclusion of this activity, the pharmacy technician will be able to:

- Identify different classes/agents available to treat Type 2 diabetes
- Explain the importance of incorporating lifestyle modifications in patients with diabetes
- Discuss updated guidelines for patients with diabetes including appropriate recommendations and schedules for blood glucose monitoring.

3:30pm-3:45pm: Questions and Wrap-up

The program venue is being held in a high tech "smart" classroom. No food or drink is allowed in the classroom. Please help us maintain the condition of this facility by respecting the no food or drink policy.

Registration Information

- Early registration required to receive discounted rate of \$110 for pharmacists and \$79 for technicians (includes continental breakfast and box lunch)
- We encourage you to register on line at <http://SCCP.learningexpressce.com>
- Registrations postmarked after October 30, 2015 will increase by \$10.
- You may mail your registration form to:

South Carolina College of Pharmacy – Continuing Education
Attention: Cori Fairchild
715 Sumter Street, Coker Life Sciences Building, Room 318
Columbia, SC 29208

- You may call or email for more information: **Cori Fairchild @ (803) 777-9979** or email@ ce.sccp.sc.edu

Accreditation: The South Carolina College of Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. This program has been accredited for 6.0 live contact hours (0.6 CEUs) for pharmacists and pharmacy technicians, including 1.5 hours of law. Participants must sign in and attend all sessions for maximum credit. Participants must complete an on-line evaluation within 30 days to facilitate transmission to the CPE Monitor. Failure to provide correct and/or complete information may result in your activity not being reported to the CPE Monitor. ACPE now requires that all credit be claimed and reported within 60 days after the live event. **This is a knowledge based learning activity.**
