Educational Objectives:

Upon completion of this program,
pharmacists will be able to:

- Recommend evidence based guideline supported therapy
- Educate patients and practitioners on new therapies
- Utilize emerging therapies in practice
- Recognize the importance of medication compliance and impact on disease burden and how pharmacists improve patient outcomes

Upon completion of this program,
technicians will be able to:

- List common medications used to treat CHF, COPD, DM, and Depression
- Discuss how health conditions impact one another
- Identify drug classes that improve cardiovascular and mental health
- Recognize the importance of medication compliance and impact on disease burden and how technicians improve patient outcomes

This is a knowledge based learning activity.

Target Audience:

Pharmacists and Pharmacy
Technicians

Statement of Accreditation:
ACPE Program

This program has been approved for 4 contact hours (0.4CEUs). Participants must sign in and attend the entire session. No partial credit will be issued. Participants will complete the program evaluation on-line within 30 days for reporting to CPE® Monitor System. The South Carolina College of Pharmacy is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of Continuing Pharmacy Education.
